DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent Application No. H09-012613. (All references cited below refer to the included English translation).

3. As to claim 1: JP '613 discloses a method of preparing a water-absorbent resin (line 2 of claim 1). The method includes a reverse-phase suspension polymerization (line 1 of claim 1, and an example at paragraphs 64-66), which takes place in multiple steps (a first polymerization is disclosed towards the end of paragraph 65, and a second polymerization is disclosed towards the end of paragraph 66). The process includes the addition of a phosphorous-containing compound to the second step (see "hypophosphorous acid soda hydrates", meaning sodium phosphinate hydrate, at the 5th line of paragraph 66).

4. As to claim 2: the referenced phosphorous-containing compound, sodium phosphinate, is an hypophosphorous acid (phosphinic acid) compound.

5. As to claim 3: The referenced example includes 1.0 mmol of sodium phosphinate hydrate and 1.6 mol of acrylic acid monomer, corresponding to 0.00064 mol of sodium phosphinate per 1 mol of water soluble ethylenically unsaturated monomer.
